

➔ A LOOK AT
RHEIN83

Recognized as the “world-leading manufacturer of spherical attachments and implant components,” Rhein83 began its successful history more than 25 years ago with founder Ezio Nardi, a dental laboratory owner from Bologna, Italy. There he began designing a new line of root supported, castable spherical attachments for removable distal extension and overdenture prosthetics. His vision was to develop and begin manufacturing attachments that were small, cost effective, easy fabrication for the laboratory and simple chairside maintenance by the dentist.

In 1986, Ezio’s daughter Claudia joined the firm. Today, as President/CEO, Ms. Nardi oversees day-to-day business while directing the company’s international operations.

Gianni Storni, MDT, joined the company in 1989 with combined degrees in dental technology and design engineering. In his position as Partner/VP of Technology, Mr. Storni

is an essential component behind the technical advancements of product development and continuing education programs.

Rhein83 currently holds 29 international patents, “CE” markings and FDA approval for the United States, and is distributed and technically supported in more than 80 countries.

Continuous R&D

Rhein83 acknowledges the changing needs for technically advanced attachment systems and how the dentist and dental laboratory approach proper treatment planning for successful removable prosthetic case design. Simply stated by Mr. Joe Tambasco, Director of Rhein83 USA, with the

“Within Rhein83 there still exists a strong desire and enthusiasm to expand into new markets, and to continue developing our manufacturing capabilities.”

—CLAUDIA NARDI, CEO

most recent state-of-the-art CAD generated technology, “Size, simplicity, function, and fabrication are core element ideologies that go into every attachment system manufactured by the company.”

International CE

Educational programs are conducted on a regular basis at Rhein83’s corporate offices. Led by Mr. Storni and his team of technical experts, the company offers multilingual seminars and practical hands-on instruction for dentists, dental technicians and international dealers.

NEW CORPORATE HEADQUARTERS FOR RHEIN83

Rhein83 recently moved into a new spacious facility featuring corporate offices, a modern research and development lab, fully equipped education center, dental laboratory, dental clinic and the latest advancements in CAD/CAM technology.

MARKET EXPANSION

Rhein83 continues developing its North American market under Joe Tambasco, Director of North America for the company. Located 30 minutes from New York City in New Rochelle, NY, the company is able to provide distribution to its domestic markets and North American dealer network. Recently, American Recovery Corp. joined Rhein83 USA in reciprocated collaboration broadening market awareness of the Rhein83 brand. Together, the companies have extended customer service, technical support, and increased continuing education programs for dentists, technicians and dealers throughout the U.S. and Canada.

FEATURED BRANDS

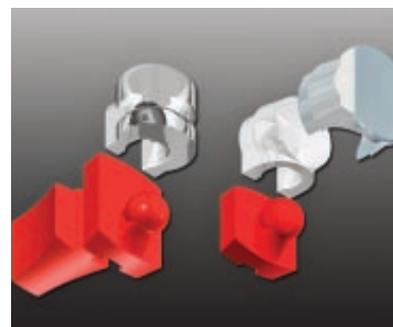

Single Threaded Spheres

With a unique internal hex design, Single Threaded Spheres are titanium nitrate coated spheres indicated for multiple placement applications on milled or cast bars.

Sphero Flex

Sphero Flex is a multidirectional rotating sphere that allows 7.5° angulation in all directions, resolving problems associated with implant divergence.

OT Strategy

OT Strategy is a vertical, micro-sized, castable sphere that is placed distally on abutments for removable partials or used with implant bar combination case design.

Sphero Block

Sphero Block are non-rotating ball attachments designed for direct implant overdentures.
